DRONE IMAGING SERVICES FOR ROOF & STRUCTURAL INSPECTIONS

COMMERCIAL & RESIDENTIAL APPLICATIONS

Our Roof & Structural Inspection Drone Services are tailored to meet the diverse needs of property managers, surveyors, and maintenance teams. By capturing high-resolution still images and ultra-high-definition video, providing a clear, detailed view of rooftops and elevated structures without the need for scaffolding or lifts.

We provide a reliable, safer and more cost efficient solutions, which may be arranged quickly, with the results delivered for your review using our secure cloud based portal.

HIGH QUALITY AERIAL ROOF & STRUCTURAL INSPECTIONS

Commercial - Roof Inspections

Create accurate 'High Definition' roof structure condition records for annual review and scheduled maintenance.

Residential - Roof Inspections

Inspections for water ingress, storm damage, insurance claims, aging problems, to assist in routine maintenance. (Insurance Company Approved Services)

We are a trusted partner for property managers, contractors, and surveyors across the UK. Our reputation is built on professionalism, reliability, and a commitment to delivering results. With full Civil Aviation Authority Approvals and comprehensive insurance, you can be assured that every project is carried out safely and responsibly.

Historical Buildings - Roof & Structural Inspections

Inspect and record condition of historical building roof and elevated structures. Create high quality records for periodic reviews and scheduled maintenance.

Larger Inspection Projects in Heavily Populated Areas

Create high quality roof structure condition reports for annual review and scheduled maintenance.

Structural Integrity Inspections of Elevated Structures

Inspect and record highly detailed condition imagery for safety, compliance procedures and annual reviews
